## Testimonial

# Bono Farm of Placido & Giacomo Bono & sons (Calcinato - BS - Italy)

## Farm Characteristics

Type of animal	Dairy cows
No. of animals	300 lactating cows
Housing type	<input checked="" type="checkbox"/> Cubicles/stalls with bedding <input checked="" type="checkbox"/> Loose yards/bedded packs
SOP products used	SOP GOLD PRO COW

Mr. Bono told us,

*"The cubicles are much drier and more compact. Before, the slurry under the slats was full of crusts and now it is fluid and can be pumped out without any problems.*

*Before, the SCC was an average of about 300k, now it's only 170/200k.*

*The cases of mastitis are less serious and easily resolved and, whilst before we used to have more cases during the change of seasons, this doesn't really happen anymore. Now, we only have a few cases a month and often we don't have any for more than 15 days. Anyway, on average, about 4 or 5 a month.*

*To keep these results going, it is important to keep up good barn management.*

*The cases of dermatitis are less serious compared to before and there has been a reduction of about 50%."*
