SOP Srl. participates in the Zero Impact® Project. The CO₂ emissions generated by the company's activities are offset by carbon credits generated by the creation and protection of new forests.

Testimonial

Astori Brothers & Co Farm (Carpenedolo –BS- Italy)

Farm Characteristics

Type of animal	Dairy cows
No. of animals	150 lactating cows 285 total
Housing type	✓ Cubicles/stalls with straw pellets ✓ Loose yards/bedded packs with straw
SOP products used	SOP STAR COW

Mr. Astori told us,

"The SOP products contribute to the wellbeing of my herd and help my barn system to work well.

*Since I have been using **SOP STAR COW**, I have been able to reduce the ketosis in the herd drastically: I usually test the glycemia values and ketone bodies in the blood samples with dip sticks, I had about 30 cases every Summer, but the Summer I used **SOP STAR COW** I only had 1! Mastitis cases are much rarer and anyway easier to cure and so I have reduced the use of medicines on the farm.*

The somatic cells have remained below 200,000 over the last year, especially in the last 6-8 months, but without mastitis, so I have a low SCC without having to pull the cows out of the group.

*The animals are fit and very efficient from a reproductive point of view, too: from the year before treatment with **SOP STAR COW** until now, I have been able to reduce insemination straws from 3 to 2 per conception and I have managed to reduce the calving-conception interval by 15 days.*

***SOP STAR COW** helps me to get the best from my herd!"*
